

## ONLINE BANKING SOFTWARE

*Who said online banking cannot be beautiful?*

The EBANQ online banking software was designed to be the most user friendly e-banking application on the market, not only for your end-users but also for you, the administrator. The system detects and adjusts to the device, screen size and browser used, ensuring a perfect layout and functionality on desktops, laptops, smartphones and tablets alike. We can also offer fully customised white-label Mobile Apps for iOS and Android.

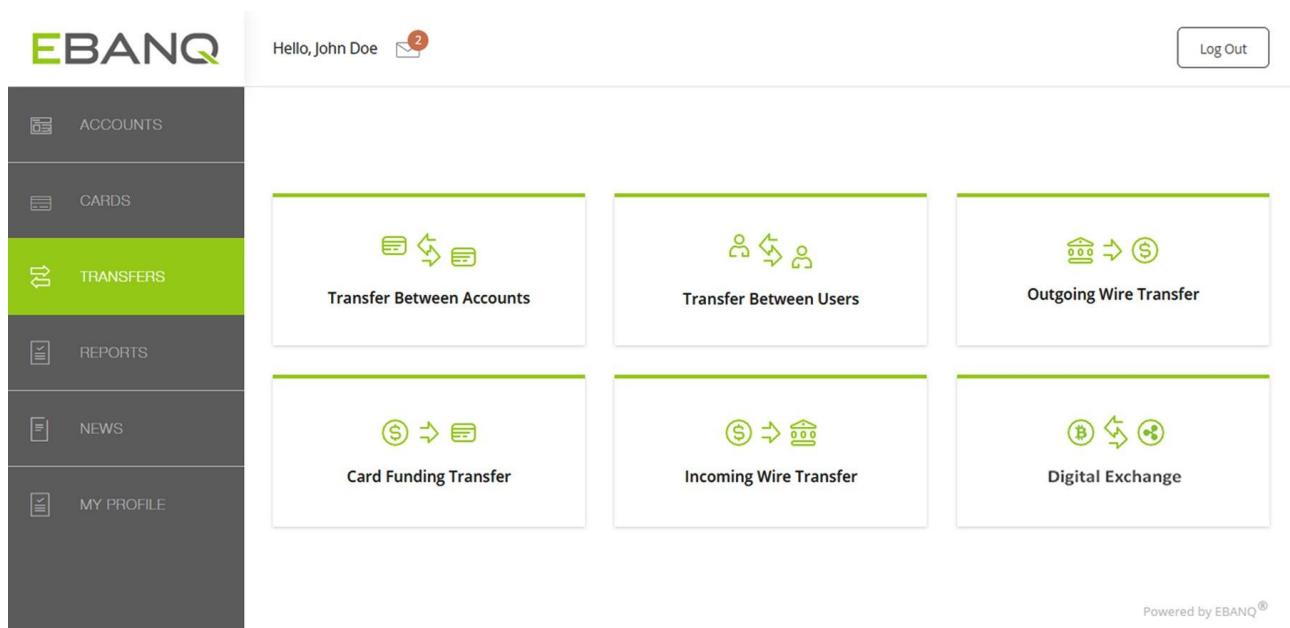

The system supports multiple administrator accounts, with different roles and permissions. All relevant transaction fees can be configured in the admin settings and applied automatically when transactions are executed. Customers can be categorised in different profile groups, allowing for different fee schedules for different client types (e.g. personal and corporate). The system supports 28 currencies by default and cross-currency transactions using a European Central Bank (ECB) feed for reference rates. Applicable rates can be adjusted to include a conversion margin. It is also possible to add cryptocurrencies or any other unit of value to our currency module. Our extensive API can be used to build additional features and third party integrations.

You can customise the system in seconds by changing the colour scheme and uploading your own logo in the admin settings.

The screenshot displays the EBANQ admin dashboard. On the left is a sidebar menu with options: REQUESTS, ACCOUNTS, PROFILES, TRANSFERS, MESSAGES, NEWS, SYSTEM LOG, SETTINGS (highlighted in green), and REPORTS. The main content area shows the user 'Hello, John Banker' with a notification badge and a 'Log Out' button. Below this is a breadcrumb trail: Profile > Account > Fee > Customization > Requests & OTP > System Email > System Config > Push notifications. The 'Customization' section is active, with sub-tabs for Scheme List, Logo, and Site Text. Under the 'Logo' tab, there is a large preview of the EBANQ logo with a trash icon to its right. Below the logo is the 'Favicon' section, showing a green 'E' icon with a trash icon to its right. At the bottom right of the customization area are 'Cancel' and 'Save' buttons. The footer of the interface says 'Powered by EBANQ®'.

*EBANQ admin settings where logo and other cosmetic features allow for a complete rebranding of the platform in seconds.*

Our clients include Banks, Electronic Money Institutions, Payment Institutions, Remittance Companies, Finance Companies, Trust Companies, Savings & Loan Associations, Credit Unions, Forex Companies, Asset Managers, Cryptocurrency Exchanges and other companies managing customer accounts in one way or the other.

*Transfer screen in the end-user interface. Users can perform internal transactions as well as requesting external bank transfers and prepaid card funding transfers. Digital currency features are optional.*

## EBANQ® DEMO ACCESS

We invite you to try out EBANQ® for yourself, by accessing the system both as an end-user and as an administrator. Please note that any users and accounts you create, or transactions you post, will be deleted on a regular basis. Please do not enter confidential or private information, since the data in the demo can be viewed by other users. Feel free to request a EBANQ® Admin Quick Guide if you do not have it already. It helps you get started quickly creating profiles and accounts.

### DEMO CREDENTIALS

#### END USER:

Username: Demo-User

Password: Demo-Access1

#### ADMINISTRATOR:

Username: Bank-Admin

Password: Demo-Access1

The DEMO login screen can be accessed here: <https://demo.ebanq.com> or with your phone by scanning this QR code:
